

Propane & Butane have evolved to LPG,

And it's a welcome end to expensive exchange Gas Bottle prices that tie you down to one product and one price, what's more it's now available from the pump at tens of thousands of Fuel Stations Worldwide.

Available at hundreds of outlets in the UK and throughout Europe, Owning your own Bottle gives massive Gas price savings as well as the ability to top up rather than exchange back half the gas as well as you being in touch with the safety of owning your own Gas Bottle.

- Are you forever wondering how much gas is left in your Gas bottle & so often exchanging it near half full because you're not sure if you have enough left for the weekend trip, Barbecue or journey.
- Are you paying over inflated prices for your "exchange" gas bottles? (as used on your RV, Boat, Caravan, Cooker, Range, Barbecue, Heater or any other Gas burner), ?
- Moreso now considering just how safe are the regular exchange bottles, thrown around for up to to 10 years, or more during many refills. Herin owning your own ensures you alone are in control of its condition and safety.
- Automatic overfill prevention device - ensuring it cannot be refilled past 80%.
- Additional back-check valve if you accidentally forget to close the valve after filling.
- Tamper-proof fittings which only allow gas to exit when connected to an appliance.
- No complicated hoses or adapters required - fill gun fits directly onto the valve for filling.

	Safefill 15ltr	Prakto 21ltr	Gaslow 21ltr	Gaslow 11ltr
